

Research Economist
National Association of Realtors
Washington DC

The NATIONAL ASSOCIATION OF REALTORS[®], America's largest trade and professional association, seeks Research Economists to conduct research on housing and real estate topics, to analyze economic, financial and real estate market data and to contribute to a variety of ongoing Research division projects.

Primary Areas of Responsibility:

1. Research - conduct research in areas such as federal and local public policy impacts as well as the effects of demographic, consumer, financial and technology trends on real estate markets.
2. Data Analysis - in support of policy advocacy and research efforts, analyze macroeconomic, housing, financial and other economic data and develop and analyze surveys for use in conjunction with other data sources.
3. New Product Development - assist with new research initiatives to produce value-added products, studies and concepts for the real estate industry and association members.

Qualifications - The ideal candidate will possess the following skills and work experience:

- Master's or Ph.D. in economics, finance or related field (or Bachelor's with significant experience)
- 3 - 5 years relevant work experience
- Real Estate and/or housing research-related work experience, preferred
- Superior writing and communication skills, required
- Experience with HMDA, AHS and micro-level census data as well as econometric and data software such as Eviews, SPSS and/or SAS, preferred
- Experience in a consulting or association environment, desirable

NAR offers a collegial, supportive, quality-driven team, compelling compensation and benefits, and a convenient Union Station/Capitol Hill location. For confidential consideration, send letter of application, resume and salary requirements to: HR-DCNAR@realtors.org. Please include "Research Economist" in subject line. No phone calls, please. EOE M/F/V/H.
